Debris Removal in Unincorporated Chatham County

SAVANNAH, GA (October 16, 2016) - Debris removal is underway for unincorporated Chatham County. The area of unincorporated Chatham County has been divided into zones. Crews are working in every zone each day. They are conducting multiple systematic sweeps in each zone to collect vegetation and construction and demolition storm debris in a non-scheduled basis. We ask that residents remain patient as this clean up continues.

Residents also are urged to separate construction and demolition debris from vegetative debris. Vegetative debris includes whole trees, branches, tree stumps, trunks and other leafy material. Construction and demolition debris includes damaged structural parts such as wood, wall board, glass, metal, roofing material, and tile. Bulk waste such as furnishings and fixtures should also be placed in a separate pile.
